

GPS TRACKING AND PARENT APPLICATION PRE-BID MEETING QUESTIONS

New Questions Received as of 05/27/21

[Pre-Bid Meeting Recording](#)

- 1) Is the bid for 3G or 4G network?

Device network should be operable for the term of the contract. If 3G will not be operable for the term it should not be bid.

- 2) There is a requirement in the RFP regarding "Configurable user reports". How many reports are expected from this application. Can you please share the kind of reports and their formats.

Reports can vary depending on the needs of the district. Reports need to be user generated for various items like idle times, odometer readings, exit door status, location, speeding violations, etc. Reports should be able to be exported to excel files.

- 3) Should these reports be displayed both on Mobile App as well as Web console.

User reports need to be accessible through the web. These reports are for district employees not the parent application users.
