

SCHOOL SAFETY ASSESSMENT & RELATED SERVICES QUESTIONS RECEIVED AS OF 11/19/21 - FINAL UPDATE

1) Has your district ever participated in a full-scale exercise before?

Yes, a County run full-scale exercise was held at North Penn High School several years ago. The exercise was not specific to school safety.

2) Would you consider ½ day tabletop drills for all administrators, safety team and first responders facilitated to help foster real communication and problem solving that keeps everyone engaged and learning.

Yes. Please provide pricing for vendor led drills separately from the recommended progression of training and exercises deliverable described in the RFP.

3) Might you consider conducting several smaller drills to create more ownership and participation during the drill? Is this something that is negotiable?

The District's desire is for a full-scale exercise occurring at a school location, using to the extent possible the equipment and personnel that would be called upon in a real event. The scale and scope of this FSE will be arrived at through collaboration between NPSD, the vendor, and stakeholders from the County and local public safety. Vendors are encouraged to recommend smaller functional exercises in preparation for the FSE.
